Begonnen am	Sonntag, 1. Mai 2022, 19:08
Status	Beendet
Beendet am	Sonntag, 1. Mai 2022, 19:15
Verbrauchte Zeit	6 Minuten 38 Sekunden
Feedback	Congratulations, excellent performance (90-100%).

Frage 1

Vollständig

Erreichbare
Punkte: 1

Identify performance goals for mobility management mechanisms?

Wählen Sie eine oder mehrere Antworten:

- ☒ a. Scalability of the mobility management solution to large networks
- ☒ b. Minimize the overhead for data and signaling traffic
- ☐ c. Minimize the layers involved in mobility management
- ☒ d. Minimize the number of lost packets during the handover process
- ☒ e. Scalability of the mobility management solution to a large number of mobiles

Frage 2

Vollständig

Erreichbare
Punkte: 1

What are the implications of mobility management by the application layer?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. Mobility management is local to the current subnet
- ☒ b. Mobility may result in changes of the radio link
- ☐ c. Requires modifications to the network infrastructure
- ☒ d. Mobility may result in changes of the TCP or UDP port
- ☒ e. Mobility may result in changes of the IP address

Frage 3

Vollständig

Erreichbare
Punkte: 1

What are the implications of mobility management by the link layer?

Wählen Sie eine oder mehrere Antworten:

- ☒ a. Mobility may result in changes in the radio link
- ☒ b. Mobility management is local to the current subnet
- ☒ c. Mobility is transparent to the transport layer
- ☐ d. Mobility may result in changes of the TCP port
- ☐ e. Mobility may result in changes of the IP address or IP routing table

Frage 4

Vollständig

Erreichbare
Punkte: 1

What are the implications of mobility management by the network layer?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. Mobility management is local to the current subnet
- ☒ b. Mobility may result in changes of the IP address
- ☒ c. Mobility may result in changes of the radio link
- ☐ d. Mobility may result in changes of the TCP port
- ☒ e. Mobility is transparent to the transport layer

Frage 5

Vollständig

Erreichbare
Punkte: 1

What are the implications of mobility management by the transport layer?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. Mobility may result in changes of the TCP port
- ☐ b. Mobility management is local to the current subnet
- ☐ c. Requires modifications to the network infrastructure
- ☒ d. Mobility may result in changes of the IP address
- ☐ e. Mobility is transparent to the transport layer

Frage 6

Vollständig

Erreichbare
Punkte: 1

What are the tasks of seamless mobility management?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. Ensure that the current IP route, the traffic takes is not interrupted due to mobility
- ☒ b. Ensure that the application is not interrupted due to mobility
- ☒ c. Enable that a mobile is reachable wherever it is located
- ☒ d. Ensure that communication continues even after the mobile associates to a different point of access
- ☐ e. Ensure that the current radio link remains active all the time

Frage 7

Vollständig

Erreichbare
Punkte: 1

Which is the highest layer in the TCP/IP model that is commonly implemented in routers?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. UDP
- ☐ b. Link layer
- ☐ c. Session layer protocols
- ☐ d. TCP
- ☒ e. IP

Frage 8

Vollständig

Erreichbare
Punkte: 1

Which is the lowest layer protocol in the TCP/IP model to support end-to-end packet flow between communicating entities?

Wählen Sie eine oder mehrere Antworten:

- ☐ a. Link layer
- ☐ b. DHCP
- ☐ c. TCP
- ☐ d. UDP
- ☒ e. IP

Frage 9

Vollständig

Erreichbare
Punkte: 1

Why can the cooperation between layers improve the handover performance?

Wählen Sie eine oder mehrere Antworten:

- ☒ a. Higher layers may temporarily freeze its transmission during the handover in order to reduce the number of packets transmitted over an obsolete route
- ☒ b. Higher layers may temporarily freeze its transmission during the handover in order to reduce the number of transmission errors
- ☒ c. Higher layer may instruct PHY layer on which band to search for channels
- ☒ d. Lower layers may inform higher layers of upcoming radio problems (decrease of SINR) before the transport connection actually fails due to errors
